

WHO WE ARE

- Currently operating in Pennsylvania with a heavy strategic focus on offering home dialysis services to community patients.
- Strong clinical focus, reflected in quality of care to patients that we serve.

Compass Home Dialysis is truly invested in changing the dialysis industry through designing an attainable access to care model. Our vision rests in the idea that every dialysis patient is deserving of individualized care, tailored to their needs and not the needs of the dialysis provider. With this vision, our mission to provide an abundant quality-of-life improvement to dialysis patients everywhere is an absolute realization.

DIALYSIS

Your Way[©]

Innovative, Compassionate Care

DIALYSIS YOUR WAY ©

Our Dialysis Your Way© program is revolutionizing the industry through the delivery of staff-assisted dialysis therapy within the comfort of the patient's home. This program is designed to offer patients the ability to complete their dialysis treatments around their schedule and not the schedule of the dialysis facility. In essence, our organization brings this life-sustaining therapy to the patient's doorstep, on their terms, delivered by our care team, thus empowering them to live a fulfilled life.

OUR TEAM

Compass has assembled a team with decades of experience in the dialysis industry. With our collaborative focus and knowledge of the industry, our collective goal is apparent; to always remain vested in the interest of placing the care of patients above all else. It is in this ideology that we will positively impact and ultimately improve the lives of the patients we serve.

A common theme emerges as we discuss the goals, vision, and collective focus of Compass and the team that defines it; that theme is the patient! It is our promise to always ask one constant question behind every decision that we make; "Does this offer the best possible outcome to the patient?"

ADVANTAGES OF DIALYSIS YOUR WAY ©

- DELIVERING CARE ON **YOUR** SCHEDULE
- IN THE COMFORT OF YOUR OWN HOME
- REVOLUTIONARY ACCESS TO CARE
- IMPROVING PATIENT QUALITY OF LIFE
